### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: in claim 8, step (d), last line, changing "determined in step (d)" into --determined in step (c)--.

2. The following is an examiner's statement of reasons for allowance: regarding claim 1, the instant application is deemed to be directed to a nonobvious improvement over the invention patented in US. Patent No 6,741,093 and International Publication Number WO 02/077654 A1. The improvement comprises a method of determining leakage current of dielectric of a semiconductor wafer having the steps determining from an acquired phase angles, changes in a conductance of the semiconductor wafer and the dielectric as a function of changes in a voltage of a swept DC voltage and determining a leakage current of the dielectric from the changes in the conductance. Since claims 1-7 depend from claim 1, they also have allowable subject matter.

Regarding claim 8, the instant application is deemed to be directed to a nonobvious improvement over the invention patented in US. Patent No 6,741,093 and International Publication Number WO 02/077654 A1. The improvement comprises a method of determining leakage current of dielectric of a semiconductor wafer having the steps determining from an applied electrical stimulus, conductance values of the dielectric and the semiconductor wafer and determining a leakage current of the dielectric from the conductance values determined from step above. Since claims 9-15 depend from claim 8, they also have allowable subject matter.
